Product description

PORTHOLE FOR DOORS phi 350 mm. Black (RAL 9005).

PORTHOLE FOR DOORS, which is in our offer, is a wonderful porthole with a diameter of 350 mm to be fitted to the inner door. It fits perfectly into standard door sizes with a thickness of 40 mm (other door thickness are possible according to individual arrangements). The rings are made of stainless steel, while the glass is matte. The rings are painted black.

The offered set includes:
- Ring pressed from stainless steel (powder coated to RAL 9005 - black) with holes - 2 pieces,
- Glass matte - 1 piece,
- A set of nuts and bolts.

Nuts:
A flange nut

The embossed porthole's installation

1. Cut a hole in the door according to the table ("Dimensions portholes").
2. Attach one part of the porthole to door and mark places to drill holes for the screws.
3. Drill the drill holes for the screws.
4. Screw the porthole together with a set of bolts and nuts.
5. .... and it's ready!

The installation of a porthole is very easy! Go for it!
